

Case Study

Forensic Science Northern Ireland (FSNI)

Equiniti ICS provided FSNI with a flexible and scalable forensic case management system fully integrated with a COTS laboratory information management (LIMS) system and a quality management EDRMS system.

Our Perito Case framework allowed for seamless integration with a range of software products and systems. The system provides users with easy access to case information, automated & governed process management and facilitates sophisticated business intelligence reporting.

Items submitted to FSNI have full traceability, right from the point of item reception at the laboratory. In addition, the system fully recognises and complies with all customer specified product requirements and industry standards, allowing FSNI to prioritise work whilst meeting ISO 17025 quality standards.

Perito Case

**Complex case management
for the public sector**

Complex case management for the public sector

Bespoke case management platforms are often seen as time consuming to build, risky and expensive to implement. We recognise this and have developed a platform that provides value for money in a timely manner.

Bespoke 30%

Full control
Flexible and scalable

70% Perito Enterprise Framework

Reduces Risk
Reduces Cost
Reduces Timescales

Helping achieve digital transformation of public services

With an off the shelf offering designed to meet complex case management requirements, we then take client requirements and build a tailored system around this base, offering unparalleled levels of extensibility to fulfil exact requirements. This principle allows us to offer a fully integrated case management platform whilst also delivering exceptional value to clients.

Perito Case is designed to work across multiple sectors and provides a single citizen view allowing for the reuse of data across boundaries

Key features:

- 

1. RAPID CUSTOMISATION AND DEPLOYMENT
Making use of our readily available components, including mobile working and citizen portal, each project is developed on our sophisticated enterprise framework.
- 

2. WORKFLOW INTEGRATION
Our workflow module helps to automate and support business process.
- 

3. BROWSER BASED, WIDGET USER EXPERIENCE.
Personalised views of content for individuals and teams.
- 

4. BUSINESS PROCESS SCALABILITY AND FLEXIBILITY
Our platform can grow to handle increased volume and increasingly complicated business processes.
- 

5. INTEGRATION WITH LINE OF BUSINESS APPLICATIONS
Integrates with a broad range of data sources and common data frameworks.
- 

6. SERVICES BASED OPEN MODULAR ARCHITECTURE
Allowing you to swap in components or use your own UI, Datasources etc
- 

7. INTEGRATED DOCUMENT AND RECORD MANAGEMENT.
Complete end-to-end document management solution, from inception to disposal.
- 

8. COMPREHENSIVE BUSINESS INTELLIGENCE AND REPORTING FRAMEWORK
Supporting customer views within PeritoCase, or integrating with PowerBI, Diver and SSRS.
